

Getting Started with Maptur in Blender

This guide will walk you through installing and setting up Maptur in Blender so your desktop and mobile interfaces work perfectly together.

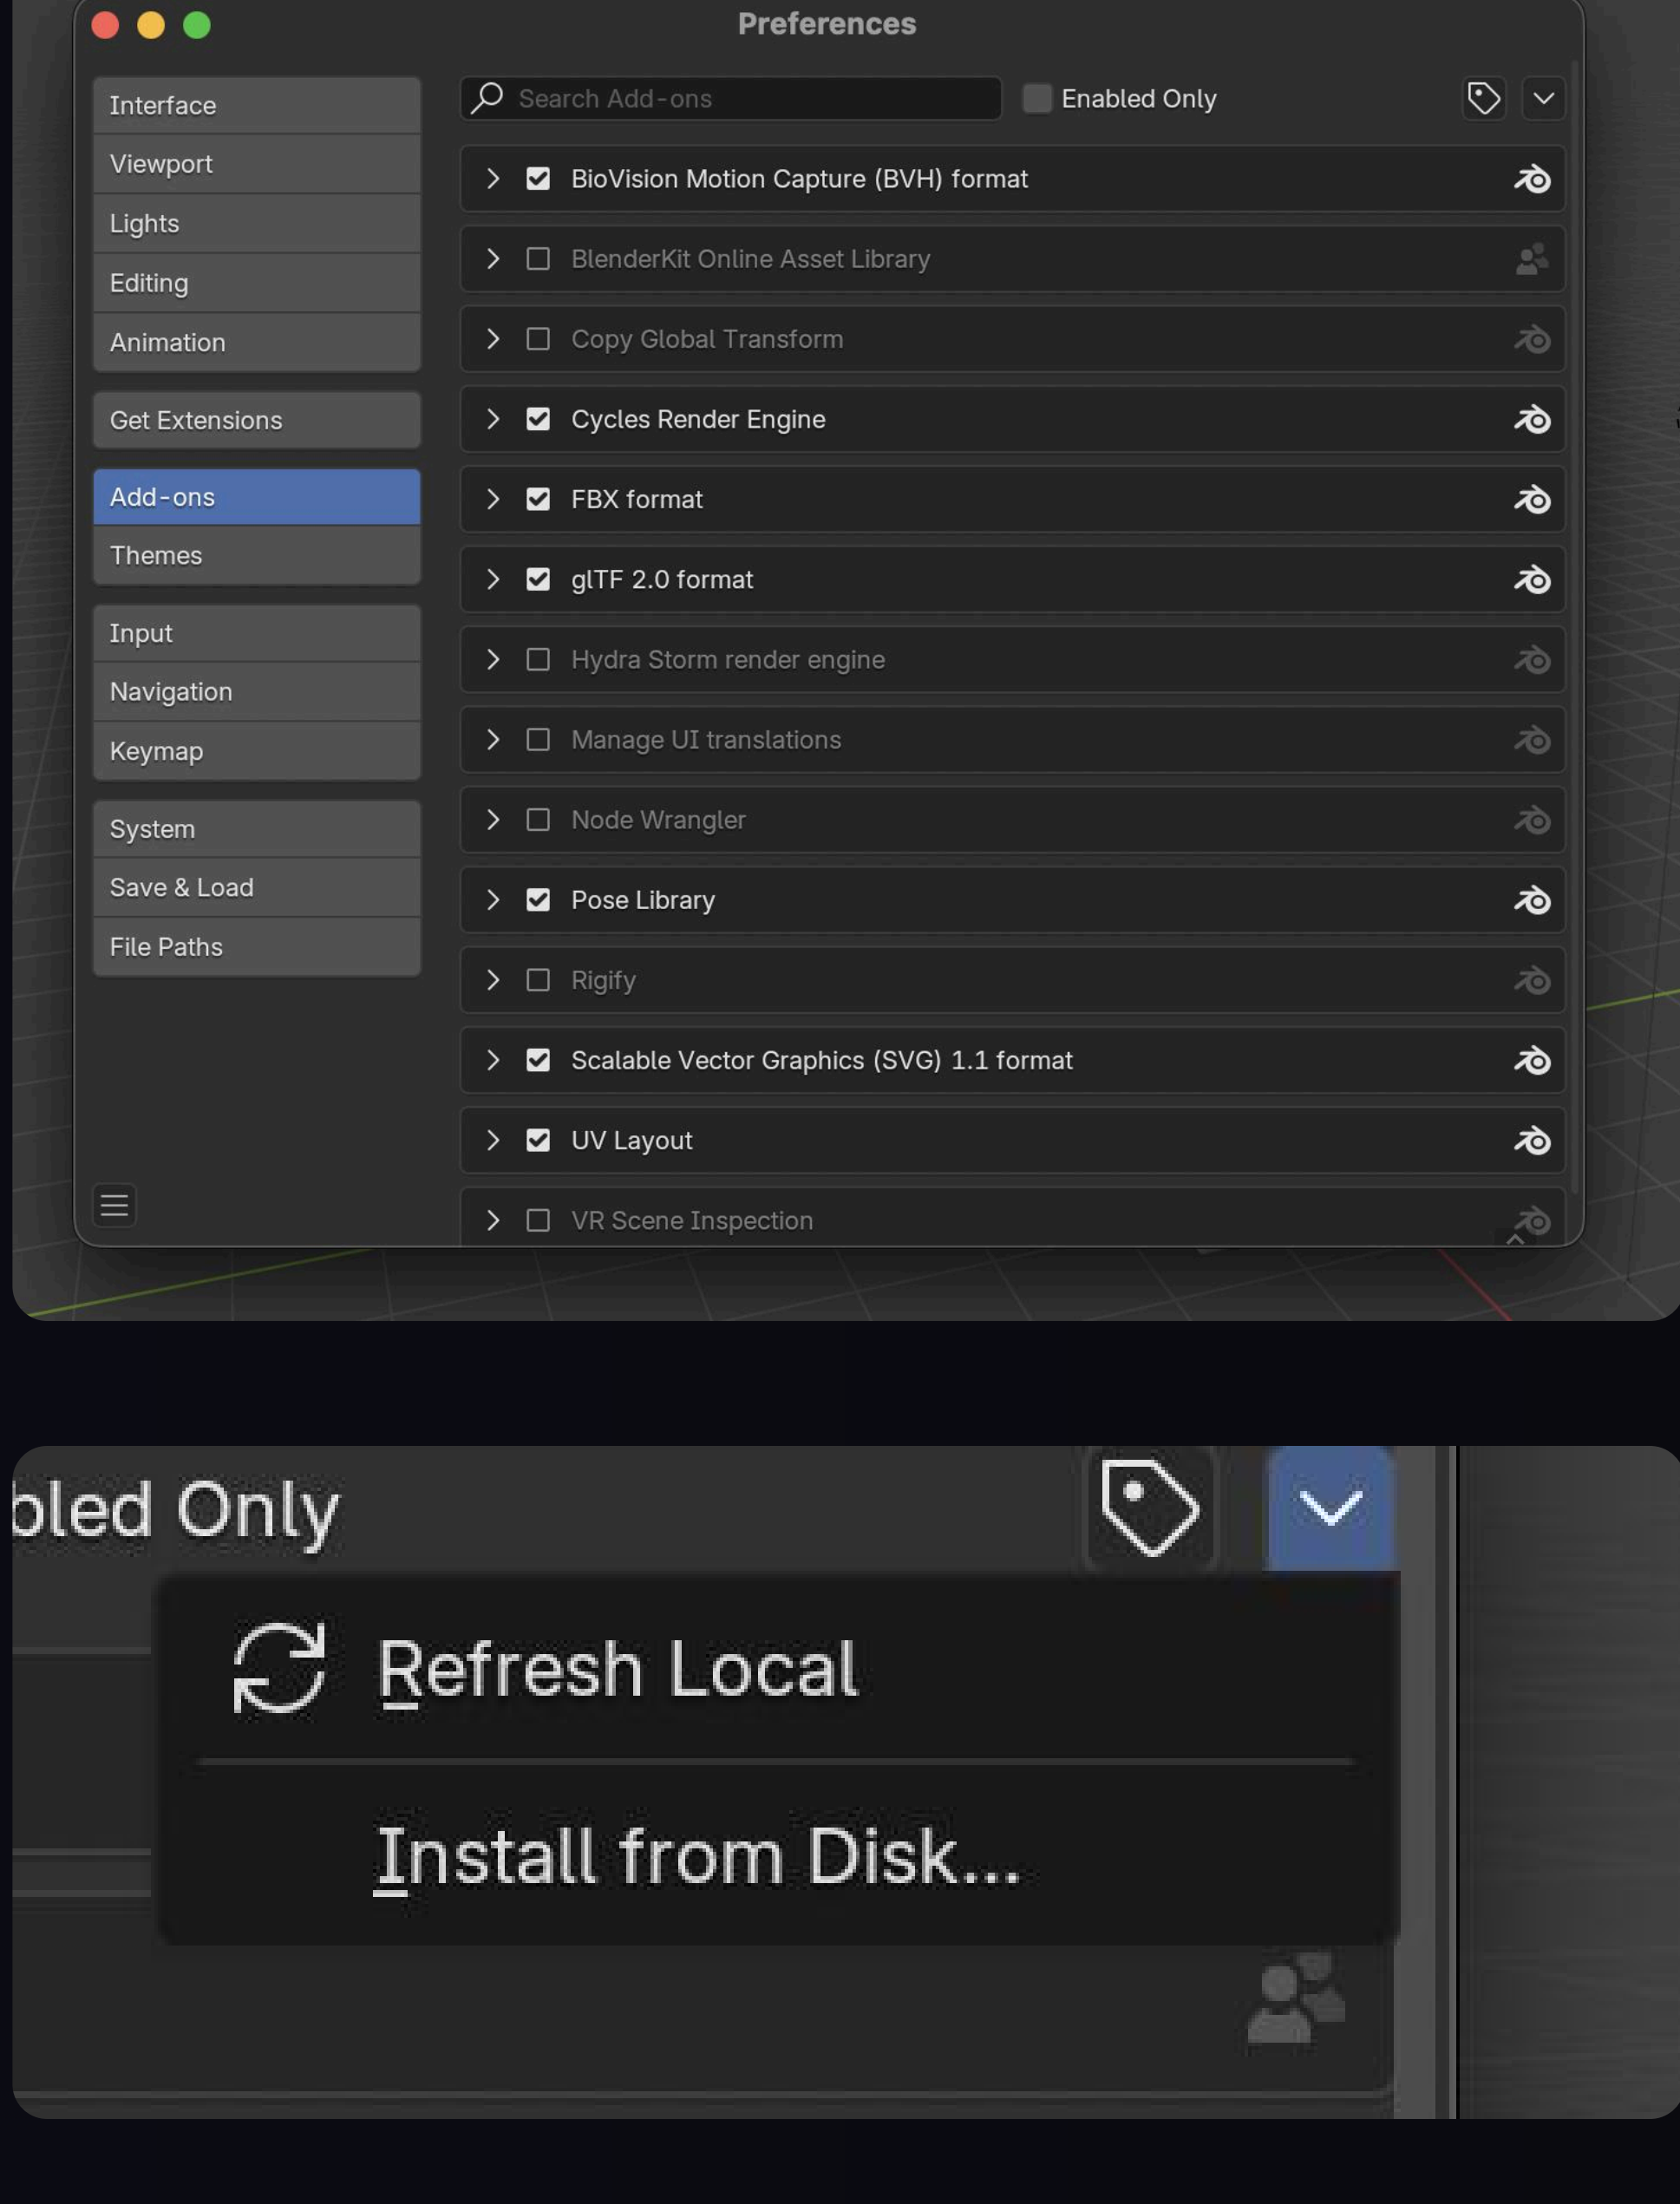

Step 1: Blender Settings

Open Blender and then navigate to Edit → Preferences

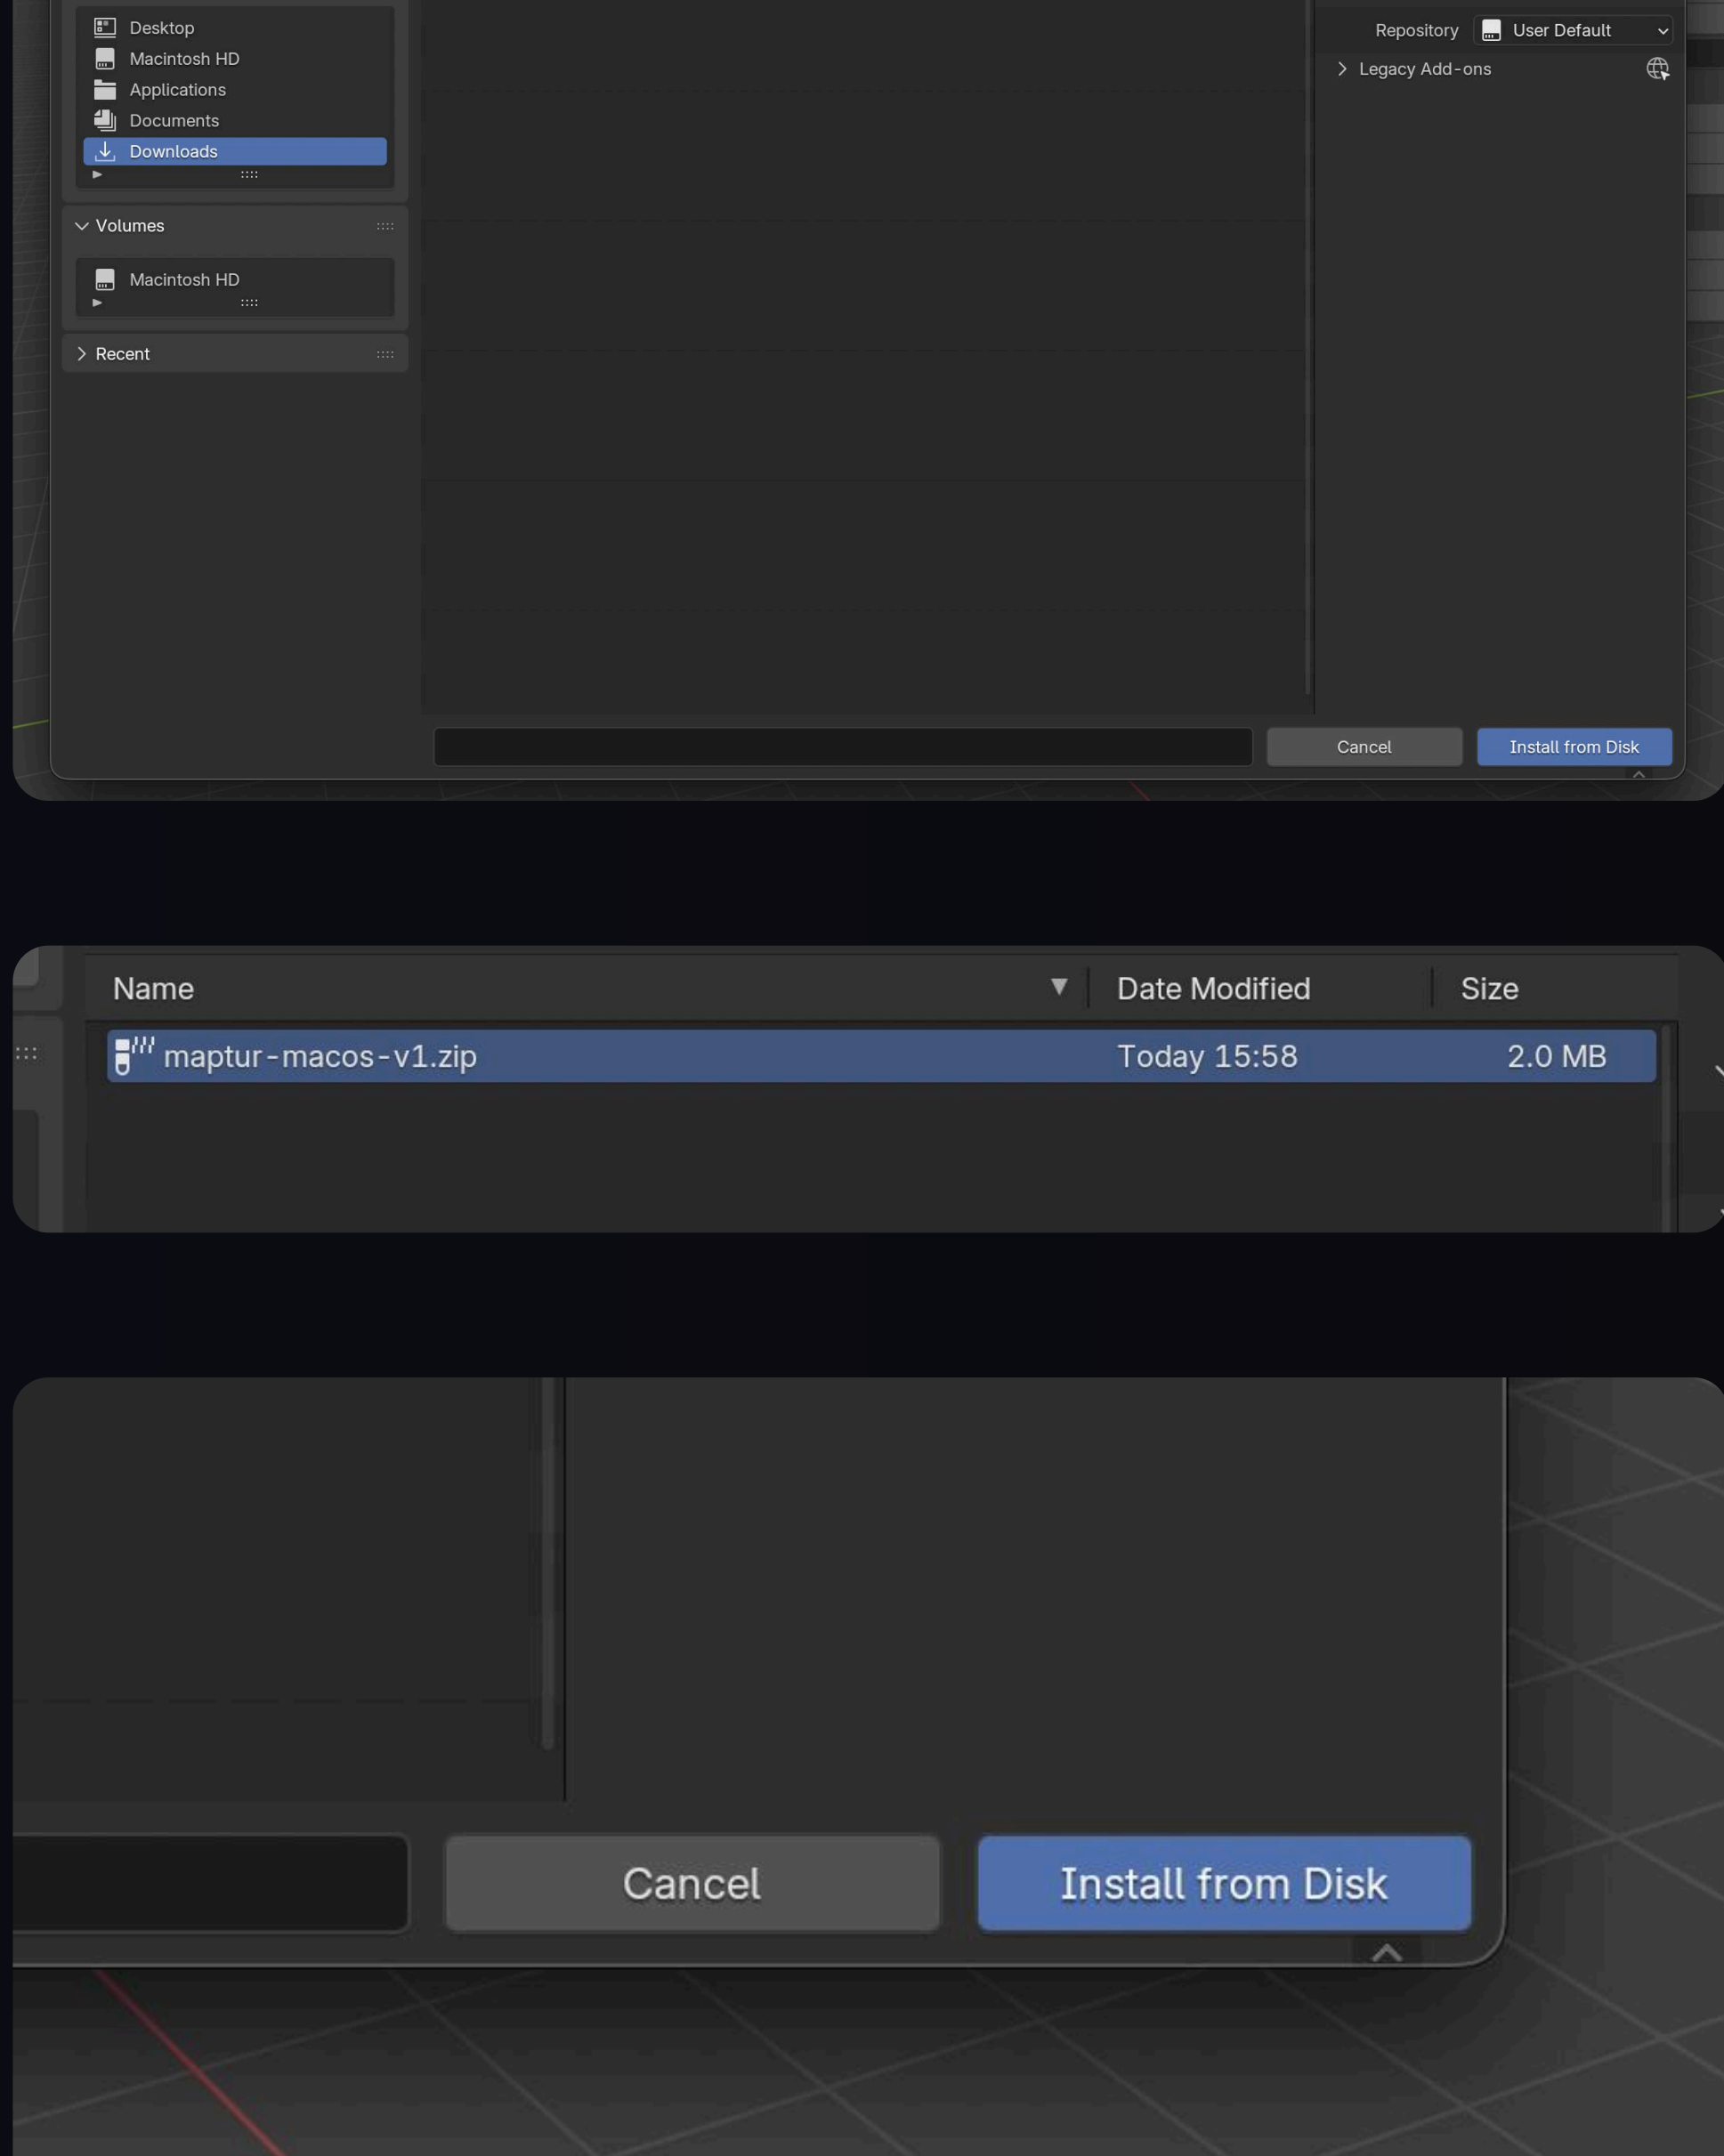

Step 2: Addon Menu Navigation

In the Preferences window, click Add-ons, then click the down arrow (!) in the top-right and select Install from Disk.

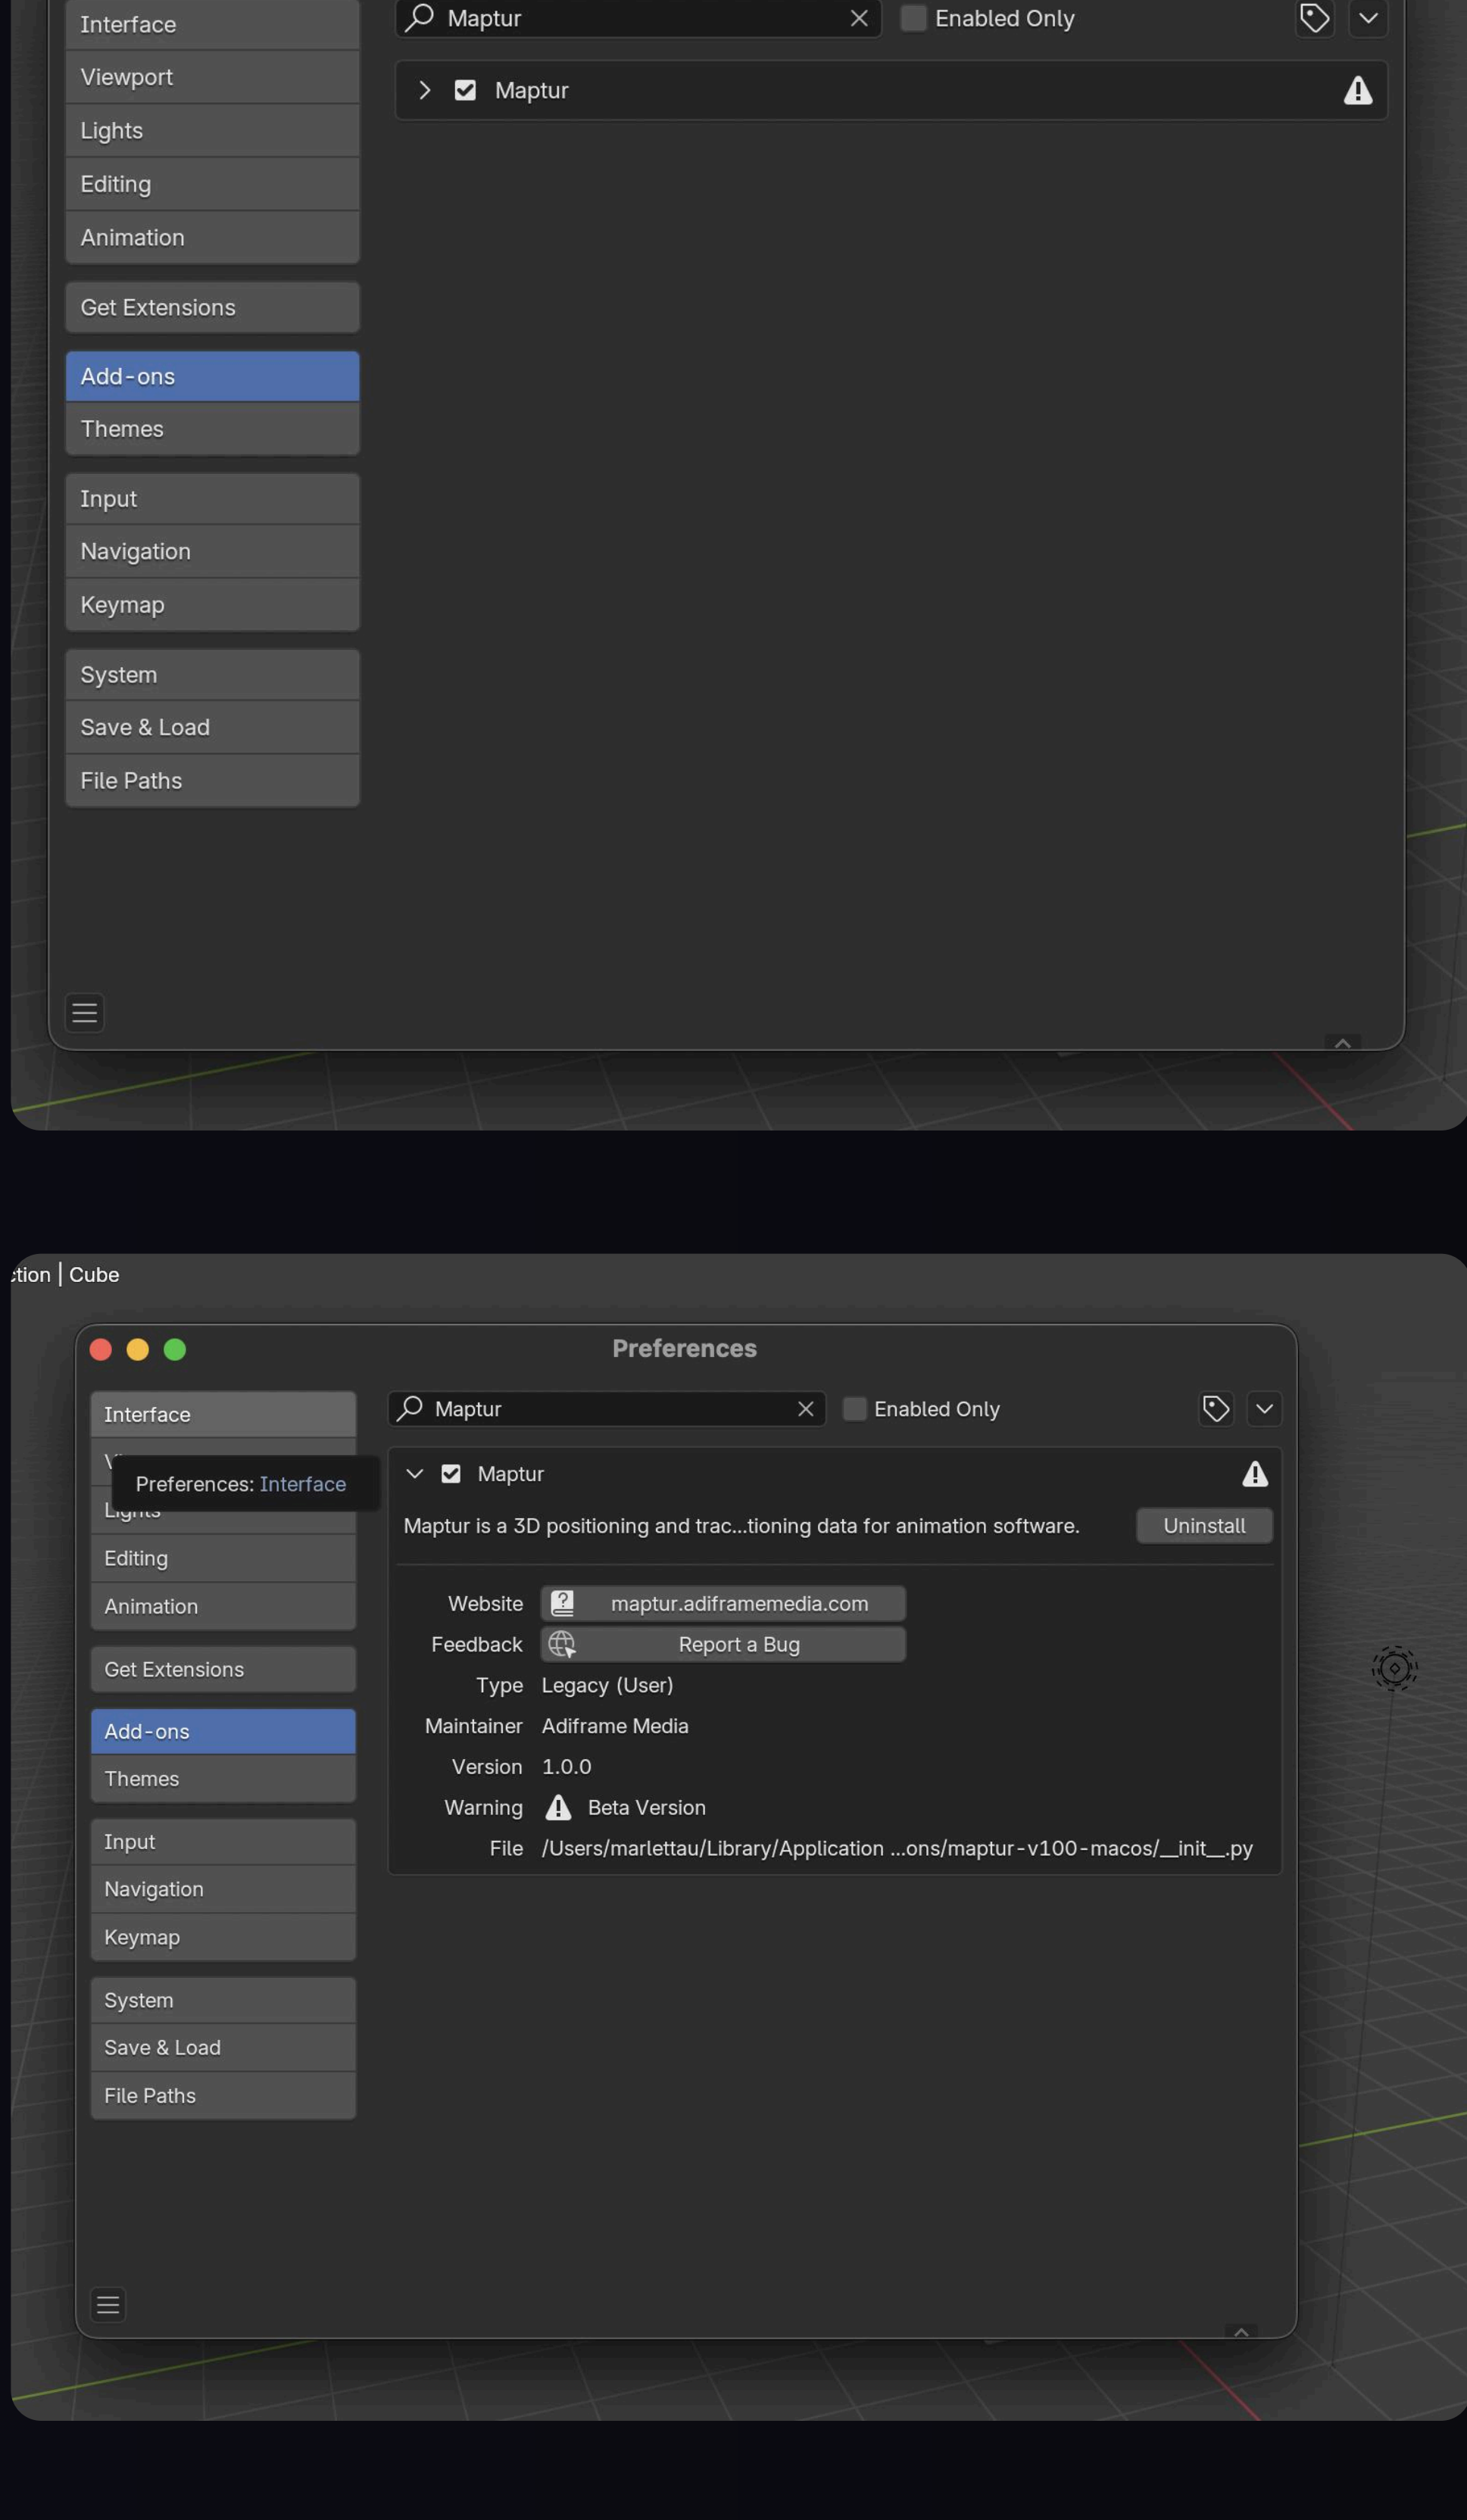

Step 3: Installing the Addon

Browse to the downloaded .zip file, select it, and click Install from Disk in the bottom right.

Step 4: Verifying Installation

Once installation completes in Blender, the add-on will appear in the Add-ons menu with a checkmark next to it.

Step 5: Logging In & Startup

On first install, sign in to your valid Maptur Pro account in the Portal to unlock the Maptur interface in Blender.
